

Fossomatic™ 7

Somatic cell counting for raw milk testing

The Fossomatic™ 7 provides accurate somatic cell counting (SCC) capability, handling up to 600 samples per hour. Results are delivered simultaneously in six seconds while unique hardware and software features boost proficiency in the laboratory.

Innovative 7th generation technology

Fossomatic 7 is a flexible solution allowing you to choose between manual or automatic reagent mixing. Rinse liquid refill without instrument stop allows you to keep operations running at all times. A modular design makes Fossomatic easy to clean and maintain and includes a sample conveyor without need for compressed air.

Higher performance and flexible solution

With a low working factor of 100, you can rely on the repeatability of results over time, whether running at 100 or 600 samples per hour.

Optimise instrument management with FOSS digital services

Ensure consistent performance of all instruments in your network and avoid downtime by making upgrades and adjustments while instruments continue to run. Protect your database and settings with automatic back up of data.
